# Rainbow Health Solutions

*Multidimensional Approach to Health*

## **eeWater**

(electronically encoded water) is isotonic saline solution that has been programmed by Cyberscan to balance your the immune system and scalar field. It is a form of structured water. The information carried in eeWater is very sensitive to electromagnetic fields. This remedy is specific to you and is only effective while the energetic match is precise, about 2 weeks on average.

**Dosage:** Take 1/2 teaspoon 20 minutes away from food and drink 3x/day. Keep the drops in your mouth for at least 30 seconds before swallowing. Continue this until the evening before your the next treatment.

Very sensitive patients may begin by using 10 drops 3x per day and gradually work up to full dose.

Use of eeWater can cause a healing crisis and symptoms can be aggravated for 2-3 days after beginning of treatment. Sometimes entirely new symptoms appear as the body re-balances and detoxifies with eeWater. The symptoms usually resolve on their own. Healing crises are more common at the start of Cyberscan treatment.

Caffeine neutralizes effects of eeWater. You must avoid all coffee and caffeinated beverages for the duration of treatment with eeWater (that includes decaf coffee). Dark chocolate in moderation is allowed.

Keep your eeWater wrapped in aluminum foil, only open when using it. This will protect it from surrounding electromagnetic fields. You may also store your bottle of eeWater in a metal container.

Don't expose eeWater to direct light or sunlight, heat, microwaves, batteries, magnets or X-rays etc. Do not place eeWater within 3 feet from anything connected to electrical power or near wires in the wall, cell phones or cordless phones.

Refrain from using homeopathics or acupuncture for the duration of your treatment. These modalities cause changes in scalar field that can be incongruent with your Cyberscan treatment and thus reduce its effectiveness.

Drink at least 2 litres of pure water daily. Do not drink reverse osmosis or distilled water as these are devoid of minerals.

Only use supplements recommended by your Cyberscan practitioner. Do not discontinue your prescription medications.
